

Hello, All. Here we have a Show and Tell submission from Bob Cline. Thanks, Bob. Let's see some more, Members!.....Tom

Several months ago I purchased a LaBelle HO Scale Denver Rio Grande Western Gas Motor Car kit. This kit was first purchased in 2008 and someone put it away and never used it. The kit didn't come with decals so I found a set on Ebay and went to work on the challenging wooden kit. I powered the car with an old Bachmann streetcar unit and it runs very well.
