

We are kicking off 2018 with a program presented by John Parker giving his Top 10 List to Ensure Layout Reliability. John has built one of the best layouts in the country with his version of the BNSF Fall River Division, and reliability is critical since not only is John's layout amazing to see, but he hosts regular operating session. And his layout must perform well to give the operators a great experience. So come to our January meeting and learn from

the best!
